

Project Initialization and Planning Phase

Date	30 June 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Professionals and students often find it difficult to start meaningful conversations during networking events. They may struggle to identify common interests, ask relevant questions, or verify facts shared during discussions. Existing networking platforms focus mainly on connecting people but do not provide real-time, personalized conversation assistance. As a result, many users miss valuable networking opportunities and lack confidence while interacting. Personalized Networking Assistant addresses this challenge by using AI to analyze event descriptions, generate personalized conversation starters, recommend relevant discussion topics, verify information using Wikipedia APIs, and maintain conversation history for improved future interactions.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student/professional attending a networking event	Build meaningful professional connections	I don't know how to start or maintain relevant conversations	I lack personalized guidance and confidence during networking events	Nervous and afraid of missing valuable opportunities
