Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Wants to network professionally. • Searches for networking events. • Finds it difficult to start conversations.	• Opens the Personalized Networking Assistant. • Enters the event details. • Receives AI-generated conversation starters and suggestions.	• Starts meaningful conversations. • Uses fact-checking during discussions. • Saves conversation history and feedback.
Touchpoint <i>What part of the service do they interact with?</i>	• Event websites • LinkedIn • Professional communities	• Personalized Networking Assistant Web App • AI Chat Interface • Event Description Analyzer	• Conversation History Dashboard • Feedback Module • Wikipedia Fact Verification
Customer Thought <i>What is the customer thinking?</i>	• I want to make a good first impression. • I don't know how to start a conversation. • I need relevant topics to discuss.	• This tool gives useful conversation ideas. • I feel more prepared for the event. • AI is making networking easier.	• My conversations are more engaging. • I built valuable professional connections. • I'll use this tool again for future events.

Customer Feeling <i>What is the customer feeling?</i>	• Nervous • Uncertain • Curious	• Hopeful • Confident • Interested	• Satisfied • Confident • Motivated
---	---	--	---

Process Ownership <i>Who is in the lead on this?</i>	• User • Networking Event Platform	• Personalized Networking Assistant System • AI Recommendation Engine	• User • Conversation History Module • Feedback & Analytics System
Opportunities <i>How can we improve this stage?</i>	• Recommend suitable networking events. • Provide event-specific preparation tips. • Suggest networking goals.	• Improve AI conversation quality. • Add real-time conversation assistance. • Support multiple languages.	• Provide networking performance insights. • Recommend follow-up messages. • Improve personalization based on user feedback.
