Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or system outside the project that sends or receives data (e.g., User / Student / Professional).
Rectangle with numbered header	Process	An activity that processes user requests and generates AI-powered networking suggestions (e.g., Personalized Networking Assistant, AI Engine, Networking Engine).
Rectangle (solid fill, no number)	Data Store	A storage location where user profiles, conversation history, preferences, and AI interaction logs are maintained for future use.
Labeled arrow	Data Flow	The movement of data between the user, application, AI engine, and data stores, showing how information flows through the system.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

Data Flow Diagram – Personalized Networking Assistant
